Document Revision History

Version	Date	Notes
1.0	May 13, 2022	Initial version.
1.1	May 20, 2022	Updated to include new format for the user interface, including new card images and about menu item.
1.2	May 30, 2022	Updated new System screenshots for describing in detail.
1.3	June 10, 2022	Updated the new implementations.

Overview

The product allows the user to manage International Students in specific situation. User can insert and update students in the system. Users can add notes to each to student for more information.

Minimum System Requirements

The following are the minimum system requirements for International Student Management System product.

Hardware requirements

Windows®
Windows XP, Windows 7 (32/64 bit) or Higher
Minimum 4 GB RAM and higher
10 GB available space on the hard disk
Active internet connection minimum speed 512kbps and above

Software Requirements

At least one Internet Browser eg. Chrome, Firefox, Microsoft Edge, etc

International Student Management System Operation

We have to define users in the International Student Management System (ISMS).

1. **User**, is the person who is part of the International Student Advancing at the Saskatchewan Polytechnic. There are two types of users,
 - *Admin* , person who has a profile with all permissions to Insert New Users, Set Up Roles, allowed to read and create new conversations and notes from all students.
 - *Regular User* or simply *User*, person who has a Role depending to their certifications (RISIA/RCIC/No Certification). These roles will allow to users read and write conversations or notes .
2. **Student**, can be a *Prospective*, who is part of the process to be enrolled at the Saskatchewan Polytech, or *Enroll Student*.

Login Page

System Initialization

The International Student Management Sytem (ISMS) was developed to follow the Security Standars to validate user information as User Name and Password. These fundamental information will allow the user to access the system. Logging Page is first page of the system. Fig 1 Show the actual Login page.

Operation

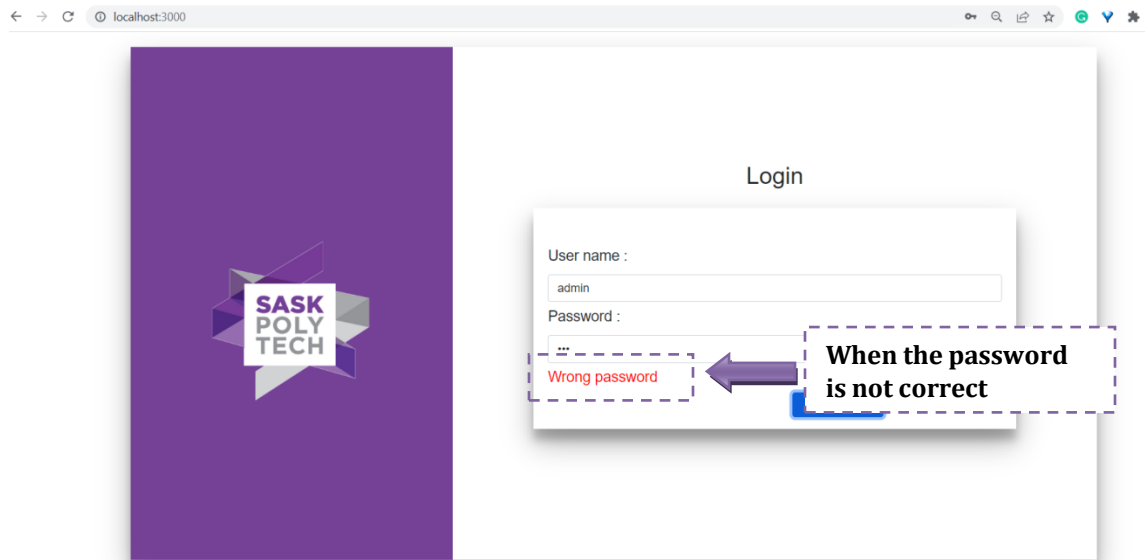

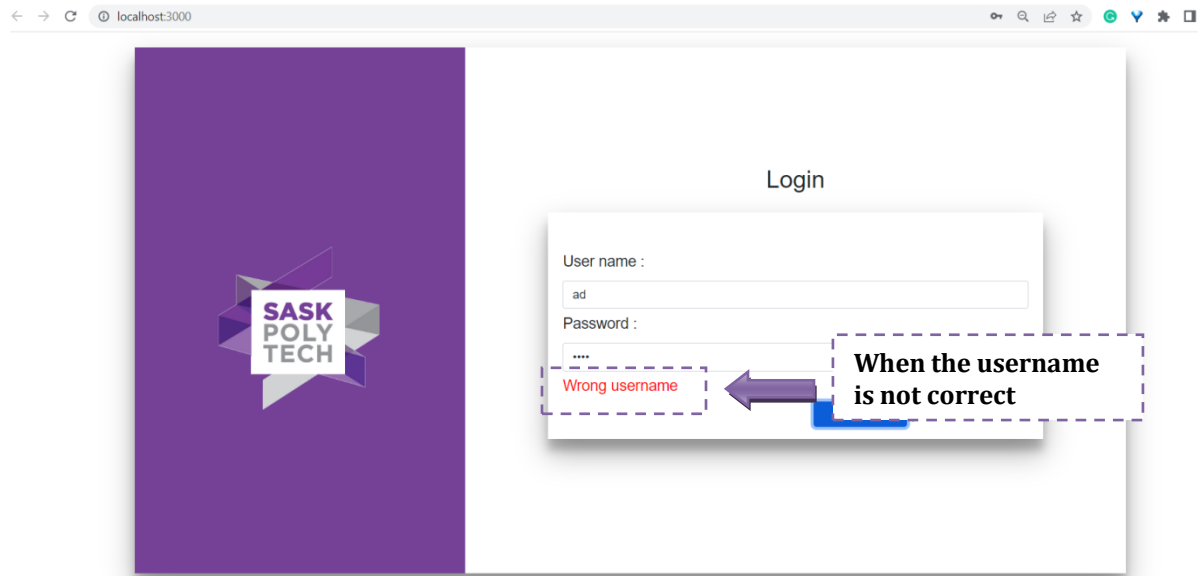

User type in the correct *user name* and *password* into the text fields to access to the system. User click on **Login button** to access. We can use the following information to login.

User name: admin
Password: 1123

The screenshot shows the login interface for SASK POLY TECH. On the left is a purple sidebar with the SASK POLY TECH logo. The main content area is white and titled 'Login'. It contains two text input fields: 'User name :' and 'Password :'. Below these fields are two buttons: a purple 'Login' button and a blue 'Reset Password' link. Annotations with dashed boxes and arrows point to these elements: 'User name text field' points to the first input field, 'Password text field' points to the second input field, and a larger box at the bottom says 'Click on Logging button to access to the System. User name and Password must be filled.' with an arrow pointing to the 'Login' button.

Validation

If the data is not correct, it will appear a validation message. The validation will show if either user or password are not correct.

When both are not correct and shows a Popup screen message.

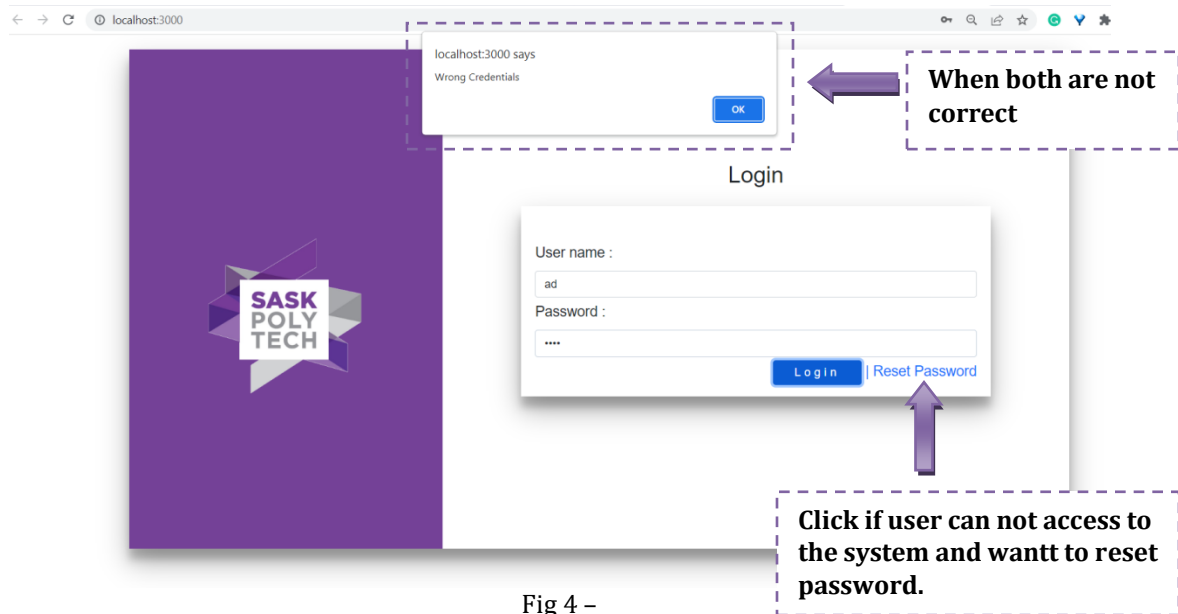

Fig 4 –

Try again, verify the Caps Lock is not activated. If user does not recall User and Password, user can recover or reset information by clicking on the **Reset Password** link. When Reset Password link is clicked, a new screen will show. The Reset Password will ask for the new password. This page is exclusively for Admin users.

Main Page – Students

When the user and password are verified without errors, the main screen or Student's Page will appear showing a table with all Students in the system. This page allows the user either **Add New/Prospective Student** or **Search** Students. The information table will be customized based on the Search Result. Table Results show minimal student's information, **Student ID, First Name, Last Name and Program**. The table sorts from the last inserted student into the system. Student ID Link will show more details about Student's information if clicked.

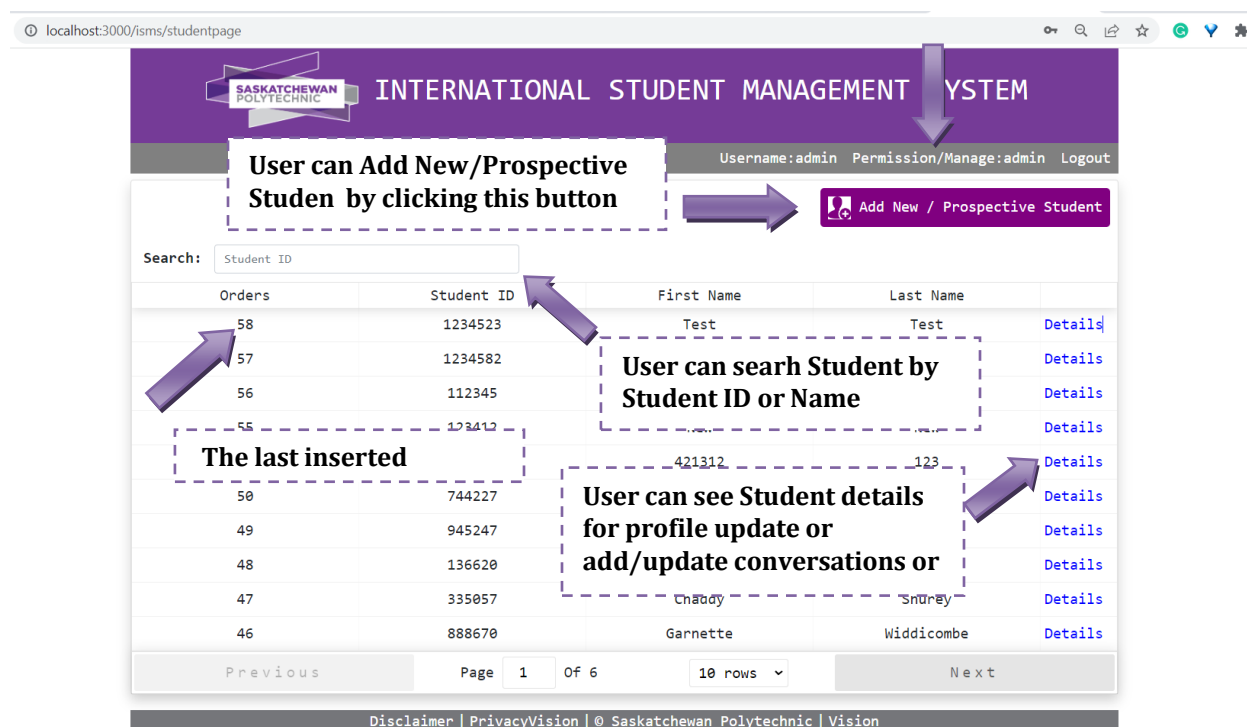

Fig 2 – Students Page

Add New/ Prospective Student

We can add a new or prospective student in the system. New Student is a enroll student and has an official Student ID. Prospective Student is a student who wants to apply to the Saskatchewan Polytechnic but does not have an official Student ID. If we click on the **Add New/Prospective Student** Link, it will navigate to the **Add New Student Page**.

Save New Student

This button will save the new student when the text fields and combo boxes are filled. Once is validated and inserted data, the system will show a message and will move to the main page. User can search the new student and verify if student was inserted into the System. Validation will be considered during the development.

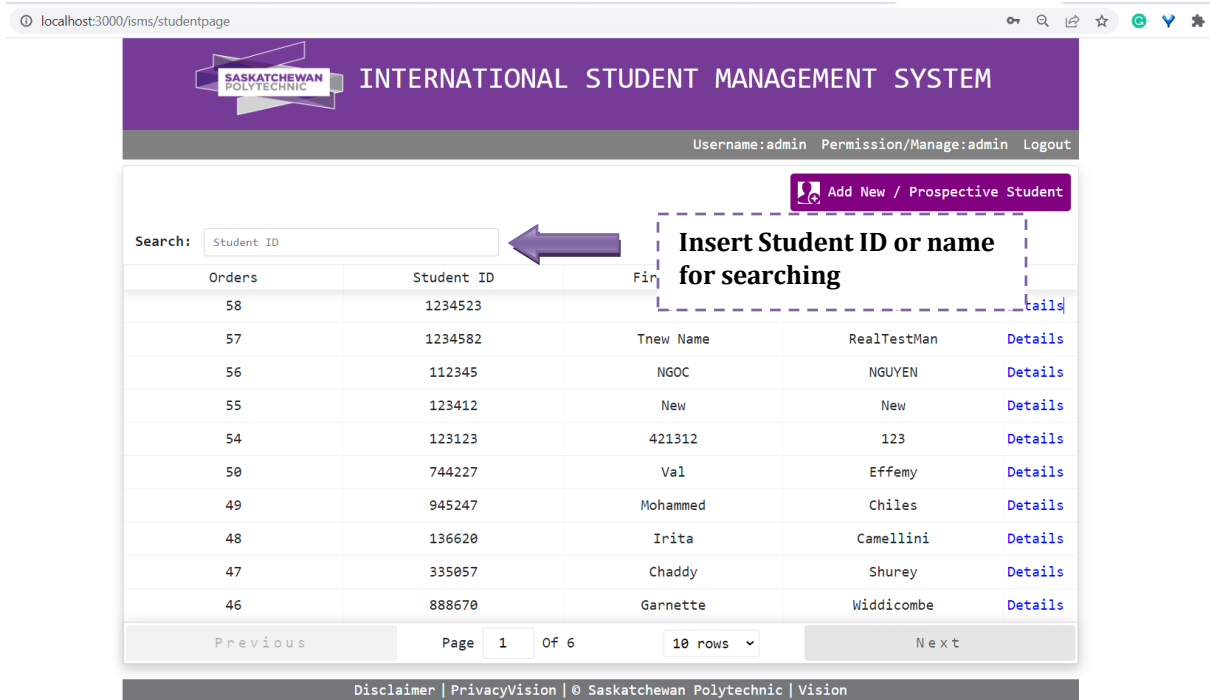

The screenshot displays the web application interface at localhost:3000/isms/addstudent. A success message from 'localhost:3000' states 'Student added successfully' with an 'OK' button. Below this, the 'Add New Student' form is visible. The form includes a radio button for 'Prospective Student' (checked) and a 'Student ID' field. The form fields are organized as follows:

- First name:** Nahn
- Middle Name:** M
- Last name:** Basamid
- Gender:** Male (radio), Female (radio, selected), None (radio)
- Birth Date:** 01/10/2016
- Country:** Australia
- Saskpolytech E-mail:** nhathnguyen4794@gmail.com
- Campus:** Regina
- Academic Period:** Fall Semester 2022/2023
- Year:** 1
- Program:** Civil Engineering Technologies
- Degree:** DIPIC
- Graduate Ind:** Yes
- Enroll:** EL

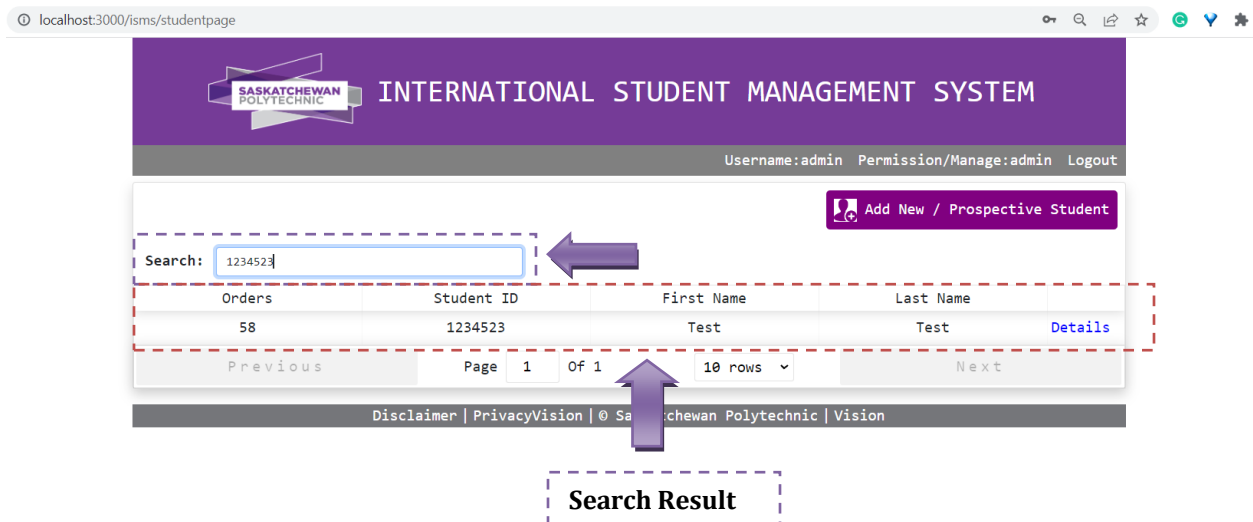

Buttons at the bottom of the form include 'Student' and 'Save new student'. A purple arrow points to the 'Save new student' button. The footer contains 'Disclaimer | PrivacyVision | © Saskatchewan Polytechnic | Vision'.

Search Student

We can search students by typing the Student ID or Student Name in the text field and enter. The table information will show that student you want to consult. The system can search a not full Student ID or student's name, the search operation will give the possibles students ID that match with the typed Student ID.

The following screen show the way to search a student by Student ID

International Student Management System – User Manual

The following screen show the way to search a student by Student Name. This example shows a search with NGOC student's name, the result can be seen in the table.

Search: NGOC

Orders	Student-ID	First-Name	Last Name

Add New Conversation

User can add new Conversation, this option will manage the student's situation. Conversation is an action to track International Student's Situation. When user adds a Conversation, that Conversation will be added to the Conversation table. This table shows **Category, Subject, Date Created, Created By and Last Update**. Note Details takes into the Conversation details from the student the user wants to update.

The screenshot displays the 'INTERNATIONAL STUDENT MANAGEMENT SYSTEM' interface. At the top, the header includes the Saskatchewan Polytechnic logo and the system name. Below the header, the user is logged in as 'admin' with 'Permission/Manage:admin' and a 'Logout' link. The main section is titled 'Student Conversation' and contains a form for adding or updating a conversation. The form includes fields for Student ID, First name, Middle name, Last name, Gender, Country, Campus, Year, Degree, Program, and Enroll. There are buttons for 'Student', 'Update Student', and 'Add New Conversation'. A table below the form shows a list of conversations with columns for Category, Subject, Date created, Created By, Last Updated, and a 'Details' link. The table has one row with the following data: Category: Visa, Subject: Example1, Date created: 2022-06-10T13:47:27.000Z, Created By: test1, Last Updated: test4. The table also includes pagination controls: 'Previous', 'Page 1 of 1', '10 rows', and 'Next'. Annotations with arrows point to the 'Add New Conversation' button and the table, with text: 'Click on this button to Add Conversation' and 'Table for general information from Conversations done.'.

Add Note Page

User can add notes to students. Notes can give specific information to the students. Users can add conversations, files, links from Shared Folder. This way will make more easy to understand the student's situation and can give a proper advice according to notes history.

The first information is from student. The user can only insert Subject to title the conversation, Category to categorized the type of conversation and License Requirement to setup the user's availability. License Requirement will let other users to read or write student's conversation. That's why Role in users are a main information that depends on the Licence.
